

Does your bank need greater system functionality and flexibility?
Tired of your system provider's poor service and rising costs?
Will your current bank processing system contract expire soon?
Looking for a bank system provider with financial stability?
Want a provider that consistently delivers pain-free conversions?

For your bank processing system questions...

Cardinal Systems is the answer!

Cardinal Systems ™

Where community banks are migrating!

▶ Cardinal Systems is a more responsive and more flexible core processing solution provider founded by pioneers in banking software. Our Cardinal/400™ system is a complete turnkey solution for data processing in community banks that represents the latest advancements in core banking software.

We have the financial stability and industry knowledge to provide the best data processing technology, training, conversion and service, today and in the future.

Benefits of the Cardinal/400™ System

- Available in-house or in a data center environment
- Supports ancillary systems and partners you choose to use
- Scales easily to grow with your bank
- Designed for speed and lower total cost of ownership
- Works with today's familiar desktop applications
- Offers unmatched flexibility to conform to your needs
- Delivers full functionality at an all-inclusive price
